Netaji Subhas Institute of Technology (NSIT), Amhara, Bihta, Patna, successfully organized a **05-Days Master Trainer Training Program on "Malware Analysis and Reverse Engineering."** The program was conducted with the objective of enhancing the technical knowledge and practical skills of faculty members in the field of cybersecurity, malware analysis, and reverse engineering.

The training covered both theoretical concepts and hands-on laboratory sessions. Participants were introduced to the fundamentals of malware, malware classification, infection mechanisms, static and dynamic malware analysis, reverse engineering techniques, debugging tools, disassemblers, virtual machine setup, and incident response strategies.

Expert trainers guided the participants through real-world malware case studies, enabling them to understand how cyber threats operate and how reverse engineering techniques can be used to identify vulnerabilities and strengthen system security. Interactive sessions, practical exercises, group discussions, and quizzes made the training highly engaging and effective.

The program concluded with an assessment and feedback session, followed by the distribution of certificates to all successful participants.

Conclusion

The **5-Day Faculty Development Program (FDP)** was successfully conducted with enthusiastic participation from faculty members. A total of **48 participants** registered and attended the program during its course. At the valedictory session, **35 participants** were present and successfully completed the program.

Day-wise Activities

Day 1

- Introduction to Cybersecurity and Malware
- Types of Malware and Attack Vectors
- Setting up Malware Analysis Lab Environment
- Virtual Machines and Safe Analysis Practices

Day 2

- Static Malware Analysis
- PE File Structure
- String Analysis
- Hash Analysis

Day 3

- Dynamic Malware Analysis
- Process Monitoring
- Network Traffic Analysis
- Registry and File System Monitoring
- Wireshark Practical Session

Day 4

- Reverse Engineering Techniques
- Assembly Language Basics
- Debugging using x64dbg
- Function Analysis
- Reverse Engineering Practical Exercises

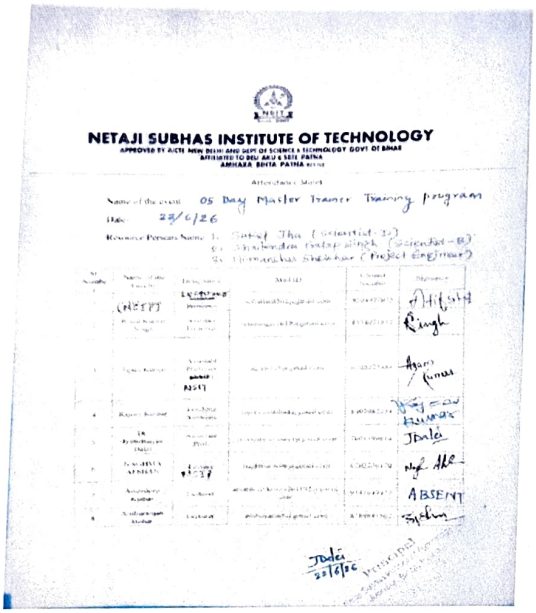

Day 5

- Advanced Malware Case Studies
- Incident Response
- Cyber Threat Intelligence
- Assessment and Hands-on Evaluation
- Certificate Distribution and Valedictory Session
